# CONNECT CAPTURE AND OPTIMIZE THE DATA WORKFLOW!

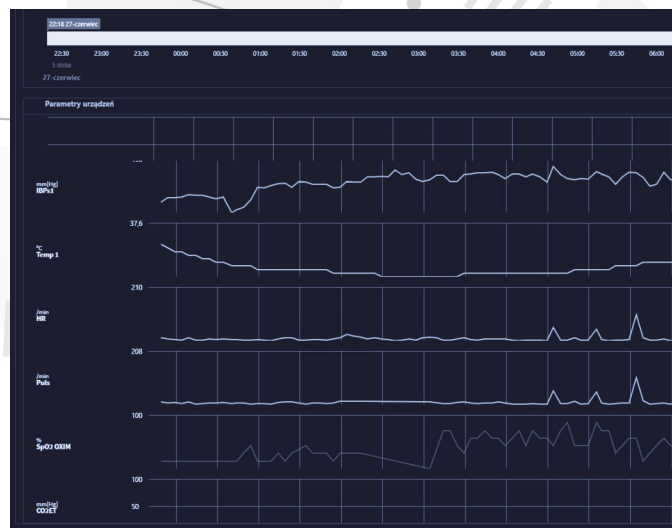

Admit patient to the OT and track his data, drug therapy and condition all the way to discharge and even more – to long term ICU treatment. EKZ and EKIT are powerful CIS solutions meeting all legal standards and recommendations.

Connect, easily with HIS system and get the patient data and lab results needed during all anesthesia procedures and ICU treatment. Store all therapy details in one document or send them via HL7 to HIS system.

Get all monitoring and ventilation parameters from any brand or model of medical device available in your hospital.

Advanced analyzing options allows you to fully calculate and compare the costs of anesthesia procedures, surgery time and staff workload. Now you can plan your surgery schedule more efficient!

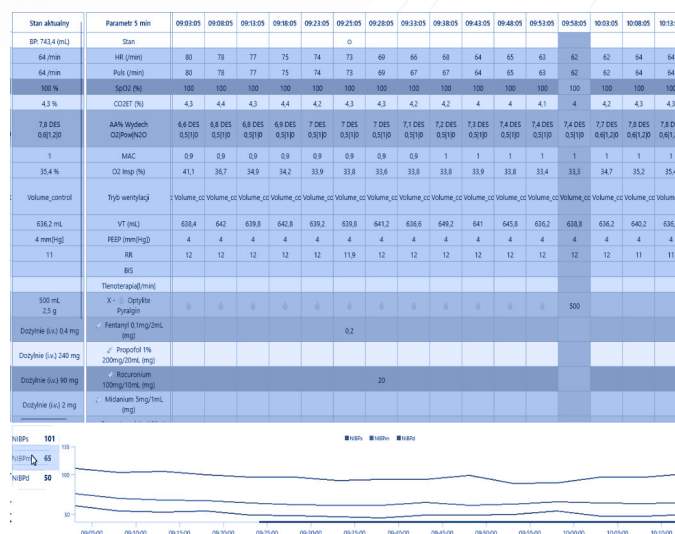

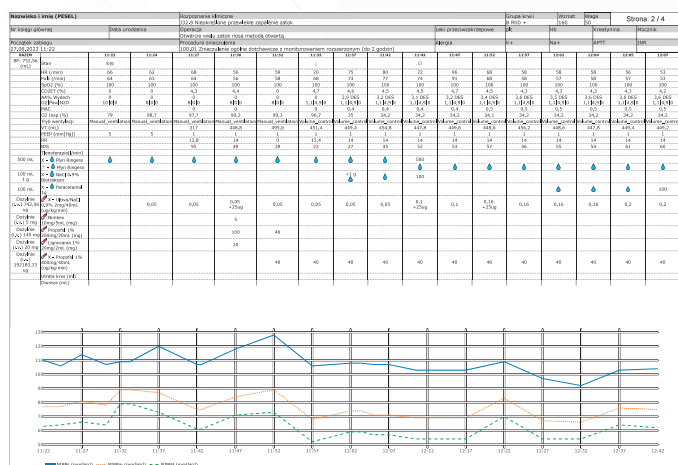

For ICU treatment easily view the trends of parameters, fluid balance, procedures and actions taken with the patient.

## FULL TRACEABILITY OF PATIENT THERAPY!

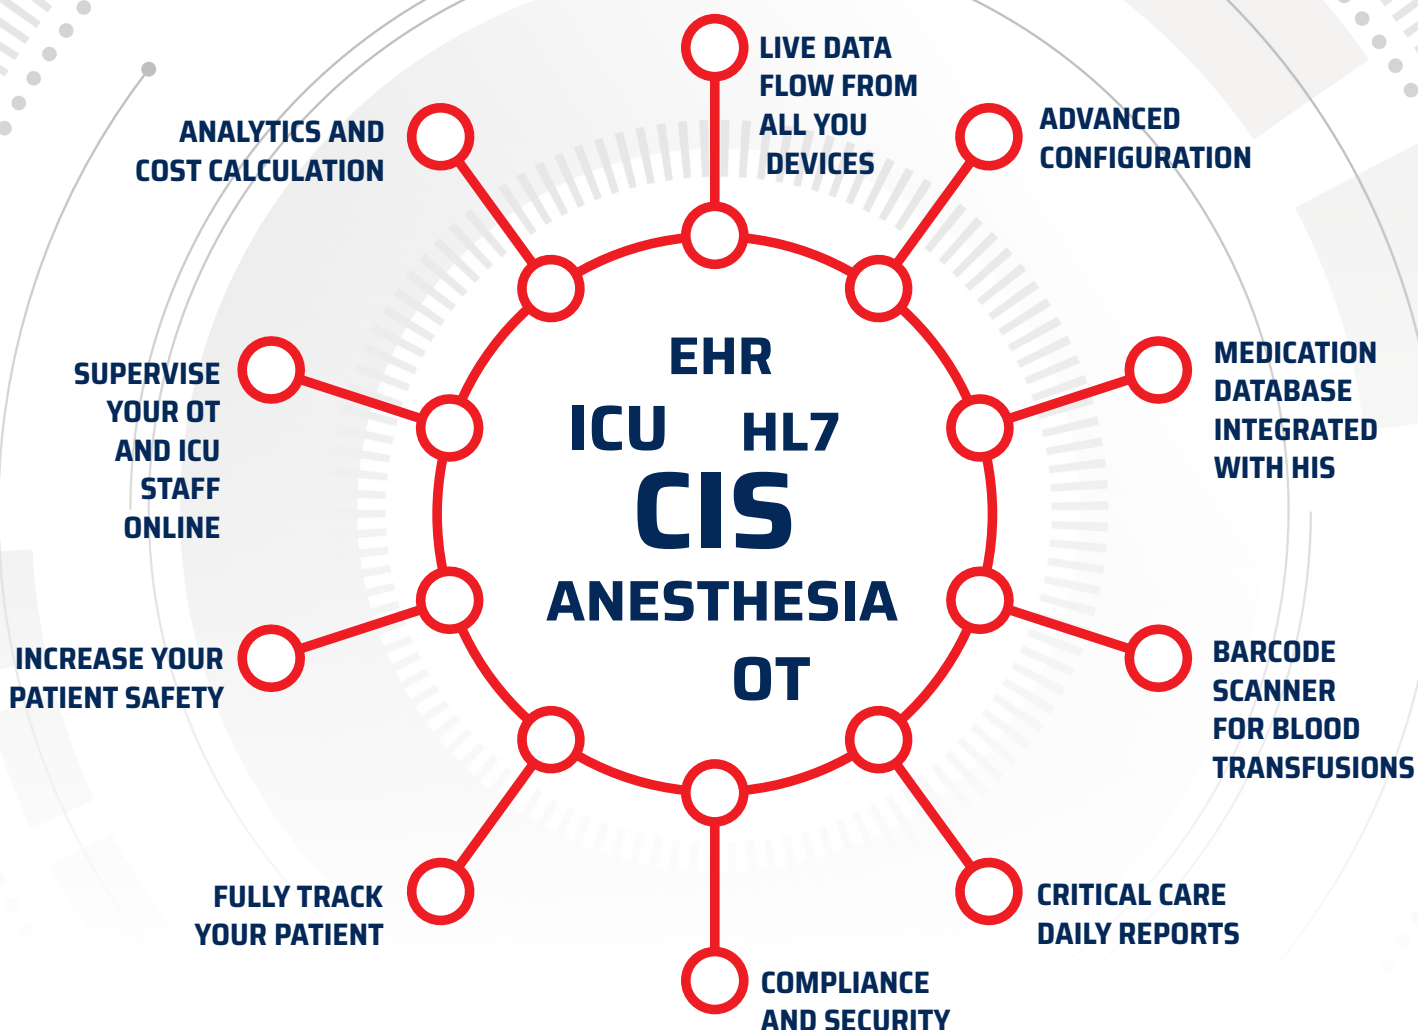

Manage all data with web browser based Maximus system – view them live from each OR and ICU bed!

EKZ and EKIT are the trademarks and manufactured by TDZ Technika dla zdrowia Sp z o.o.

Please read the user manual carefully before use.

# INTRODUCING THE CUTTING-EDGE CIS SYSTEM, YOUR ULTIMATE COMPANION FOR ICU AND ANESTHESIA MANAGEMENT.
